

# Retired Coal-fired Generator Capacity by Unit Size and Age for Select ISO/NERC Regions - 2012 to 2018

Group 1 units (older or small) include units that are either less than 200 MW's or came online before 1970

Group 2 units (intermediate) include units of between 200 MW's and 650 MW's that came online between 1970 and 1990

Group 3 units (newer or large) include units that are either greater than 650 MW's or came online after 1990

Source: EIA data and L.E. Peabody & Associates, Inc.

***A majority of MW's retired between 2012 and 2018 were from Group 1 units, i.e., small or old.***
